

Real Mobile Solution of Personal Health Record

Person-owned Health Record(PoHR)

MD Professional

HeSeL MD is a Windows-based software that allows patients to download their personal health records (PHR) in their mobile devices. Once inside, patients can use HeSeL App to store, carry, and view these records anytime, anywhere. Health records can be used by doctors to make comparison studies for better diagnosis or be sent to another specialist for a second opinion.

HeSeL MD Professional

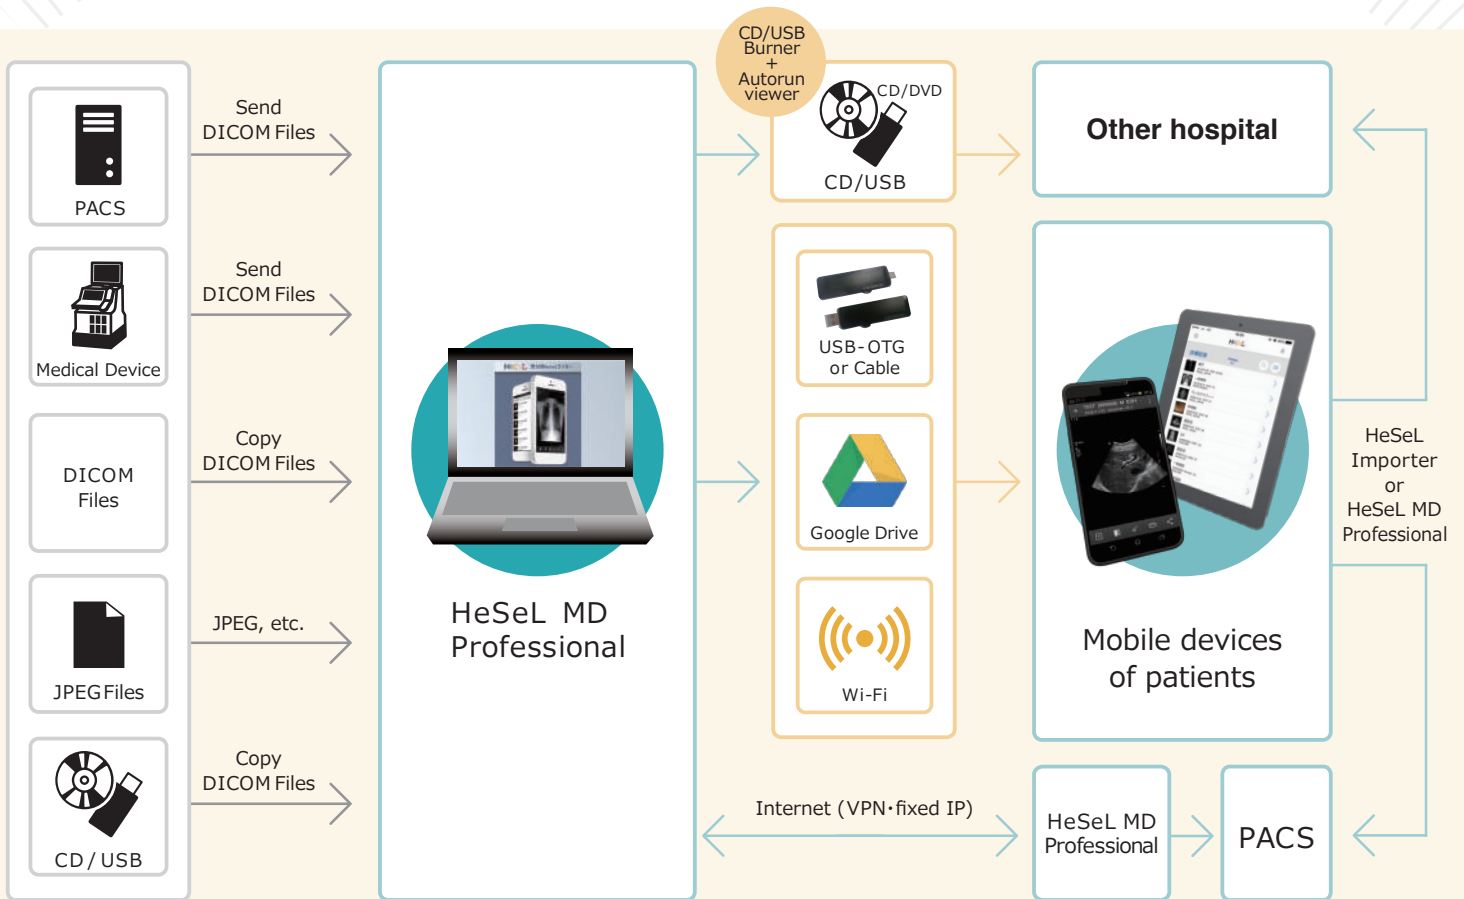

-  **Using USB-OTG media or cable,** you can send data to the smart phones of patients.
-  **Using Google drive,** you can download data via internet out of the hospital.
-  **Using Wi-Fi in the hospital,** you can send health records to patients' mobile phones.

HeSeL App Download

Person-owned Health Record(PoHR)

Moving towards mPHR: A new era where CD copies are replaced by mobile devices...

HeSeL MD Professional Merit

- **For hospitals:**
 - Increase productivity by saving time spent on burning CDs
 - Reduce costs and eliminate errors that occur while burning CDs
- **For patients:**
 - Carry and show medical records to doctor anytime, anywhere
 - Receive better diagnosis by conducting comparison studies
 - Reduce costs by avoiding unnecessary examinations

How to send images from a mobile device (HeSeL App) to a third party:

- Copy the images onto a USB-OTG and give it to the third party physically (Android only)
 - Send the images to the third party's HeSeL Importer over WiFi (Android, iOS)
- For more information, please visit our homepage at <http://www.hesel.jp>
